

LUKAS TRIMMEL M.D.

EFDMA PRESIDENT

other areas of responsibility

- representation of the association
- Chair of the Board of Directors & General Assembly

BIOGRAPHY

- born in 1974,
- married, two daughters, live in Vienna
- Specialist in physical medicine, osteopath, private practice in Vienna
- FDM instructor since 2012
- I have been a volunteer on the EFDMA board since 2015

PERSONAL

The fascinating thing about FDM is the change of perspective, which opens up unimagined therapeutic possibilities and a sense of achievement. I got to know FDM in 2006 through Georg Harrer M.D.. FDM changed the way I think and act, and with it my medical profession, forever.

Although this may sound pathetic, FDM has made me more satisfied and happier. Since I've been working with FDM, I've been able to live up to my claim to help patients much better.

MOTIVATION FOR THE BOARD WORK

I see my work in the EFDMA as an opportunity to give something back. If you are positively convinced of something, you should convey it to the outside world and let other people share the joy. I would like to work on the vision that all colleagues and patients have the opportunity to get to know FDM on a well-founded basis.
