- since 2021 Member of the EFDMA Board

PERSONAL

I completed my first FDM course in Zurich in 2013 under the guidance of Dr Georg Harrer. I still remember thinking on the first day of the course, "Finally a medical model that really makes sense to me." Since then, FDM has not let me go.

MOTIVATION FOR THE BOARD WORK

Scientific work on the effectiveness and cost-effectiveness of therapy concepts should be a high priority in medicine. My goal on the board of EFDMA is to motivate members to contribute to science in addition to their practical work on patients.
